SUMMARY

Associate Director and Chartered Accountant with 10+ years' experience across climate advisory, finance, consulting and business transformation. My experience bridges the gap between client delivery and the finance, data and systems infrastructure required to support and scale it. I translate business needs into practical systems, reporting and AI-enabled solutions that improve efficiency, commercial performance and decision-making. Proven track record of building credible strategies and driving their implementation.

WORK EXPERIENCE

Pollination

Sept. 2025 – Present

Associate Director Climate Advisory & Investment, Sydney Australia

- Built carbon market insights dashboards hosted on Vercel, used on project work, integrating multiple registry and market data on carbon project pipeline and status, credit issuance volumes and pricing, and project economics, reducing manual research time significantly
- Built and deployed internal AI tools and automations replacing manual research, market intelligence and document production workflows with repeatable processes
- Designed and delivered an internal AI session for Pollination colleagues, showcasing where AI could be applied across the business and teaching them to build their own reusable Claude skills, ahead of the firm's move to Claude Enterprise
- Built an internal prospect carbon market CRM covering 1000+ companies with segmentation, fit scoring, outreach logging, giving a practical view of target clients
- Designed and facilitated interactive workshops for diverse council groups of 130+ across climate risk, procurement and net zero targets, translating technical content for non-technical audiences
- Advised ASX-listed corporates and government on climate strategy, carbon markets and corporate disclosure under AASB S2 and IFRS S2, including executive scenario modelling using NGFS and Oxford Economics data sets

Accenture

Oct. 2022 – Sept 2025

Senior Sustainability Management Consultant, London UK

- Advised global real estate and food sector clients on carbon accounting platform selection, and project managed the tender and data integration process
- Owned the software licensing for theecoinvent emissions factor database, working with procurement to secure and negotiate the licence and managing allocation and utilisation across the team
- Led £500m+ supply chain transformation programmes, managing delivery across multiple workstreams and executive stakeholders, identifying 80% of emissions hotspots through Power BI analysis and delivering a 24% reduction in Scope 3 exposure
- Managed sales pipeline and opportunities in Workday as part of the client account team
- Managed bulk uploads of multinational procurement data from a major global food provider, cleansing, mapping and validating data and translating a Power BI insights dashboard
- Defined data standards, boundaries, calculation methods and source ownership across client reporting, working to formal external frameworks including the GHG Protocol, SBTi, CSRD and TCFD
- Built scenario and price exposure models to inform procurement decisions and investment cases
- Developed the multi-year strategy roadmap, operating model, KPI framework and governance design for NEOM's smart city megaproject in Saudi Arabia, a US\$500B+ investment, as part of a cross-functional team of five

Metlifecare

Aug. 2021 – Jul. 2022

Strategic Sourcing & Sustainability Partner, Auckland New Zealand

- Built a new procurement function from scratch as a team of two, covering process, systems, data, supplier evaluation criteria and reporting across \$220m of spend
- Delivered \$8m of savings in year one, embedding ESG criteria into supplier evaluation and contracts
- Owned FP&A for the function, building the budget, forecasts and monthly management reporting pack presented to the executive team
- Cleansed and classified supplier and spend data across the business to create a single reliable view that category and savings decisions could be made from
- Built a full Scope 1 to 3 emissions data model, defined the data sources, boundaries and ownership, and set a 42% reduction target to 2030 that was written into the terms of a Sustainability Linked Loan
- Acted as Interim Head of Sustainability, line managing one direct report and designing the Net Zero roadmap and SBTi submission that unlocked the loan
- Ran vendor selection, contract negotiation and ongoing supplier management across categories, eliminating 100% of construction waste to landfill at a 9% cost saving

Pareto Toolbox

Mar. 2020 – Aug 2021

Sustainable Supply Chain Specialist, Auckland New Zealand

- Developed single source of truth PowerBI spend cubes for client procurement data, consolidating and cleansing large volumes of inconsistent transactional data from multiple source systems into common category taxonomies and supplier master data, with clear ownership and refresh rules
- Used Power BI analysis to identify savings opportunities across categories, resulting in 17% average cost savings across the businesses
- Designed procurement operating and governance models covering decision rights, approval thresholds, category ownership and reporting cadence, improving transparency and risk control across multi-million-dollar programmes
- Owned the transformation roadmaps for client procurement programmes, sequencing supplier onboarding, system implementation and process redesign across workstreams, and phasing delivery against business priorities and available capacity
- Led transformation projects for KiwiRail with \$1.2B capex, Auckland Airport with \$500M infrastructure and Metlifecare with a \$100M portfolio, managing delivery across cross-functional teams and client executives

EY

Sep. 2017 – Mar. 2020

Consultant, Private Client Advisory Services, Christchurch New Zealand

- Qualified as Chartered Accountant (CA ANZ), delivering financial advisory, tax planning and reporting to SMEs, companies and investors across New Zealand and internationally
- Built financial models, cash flow forecasts and scenario analysis underpinning client investment and operating decisions

Benefaction

May 2018 – Aug. 2020

Co-founder, Christchurch New Zealand

- Co-founded and ran a sustainability consultancy, building the operating processes, systems and reporting the business ran on
- Reported monthly to a \$100k investor on pipeline, performance and progress, managing pipeline and delivery workflow in Monday.com
- Built partnerships with NGOs and corporates delivering measurable community outcomes across mental health and youth programmes, featured on TVNZ One News and national radio
